

# Virtual Design Master-Bonus Challenge

---

As we have mentioned, we've been very constrained by software this season on Virtual Design Master. As we rebuild our infrastructures, software development is beginning to pick up.

Your challenge is to tell us which new features you would implement in our next generation hypervisor and hypervisor management tools.

You must submit at least one hypervisor feature, and one hypervisor management feature, but feel free to come up with more.

Remember to justify why you would create each new feature.

Document submission is **due Monday July 25<sup>th</sup> at 9 AM Eastern Time.**

Email the final design to [eric@discoposse.com](mailto:eric@discoposse.com) for review. PDF is preferred.

**Good luck everyone!**
